

# Soybean Stewardship

**Anderson Building, Lyon County Fairgrounds**

**February 8, 2017**

***Reservations requested by February 6 to allow meal arrangements.***

Have your soybeans been looking weedier (or less weed-free) than you would like? Can you identify the weeds, and develop a strategy to control them? Have you heard about recently approved herbicide formulations for use over-the-top in soybeans, but don't know all the label requirements to be able to use these herbicides? Will nozzle type, spray pressure, wind and ground speed affect coverage and control?

If these questions sound familiar, plan to attend and bring a friend!

## Agenda:

**9:30 Registration**

**10:00 Weed Control Issues and Potential Practices**

— Doug Shoup, Southeast Area Agronomy Specialist  
K-State Research and Extension

**11:00 Proper Dicamba Application—Is It a Fit for You?**

— Jeff Stroup, Chemical Account Manager, Monsanto
